**VALUE  
ADVANTAGE®**

## 3 SIGNS YOU MAY NEED TO REPLACE CAR TRANSMISSION

---

1. Fluid leaks combined with a burning smell, indicating overheating and internal component failure
2. Burning smell caused by the breakdown of overheated transmission fluid
3. Presence of metal particles or shavings in the transmission fluid, signaling advanced wear of metal components

## VALUE TIPS

### Maintenance tips to help extend transmission life

---

- Regularly check the transmission fluid level and condition
- Follow the manufacturer's recommended service intervals
- Avoid harsh driving habits, such as aggressive acceleration
- Don't tow heavy loads without proper preparation\*
- Drive thoughtfully, considering the transmission's limits

## New or remanufactured transmission?

---

Remanufactured to original specifications, often with updates for enhanced performance and reliability

**Lower resource consumption**  
Conserves raw materials and energy, supporting sustainability

**Waste reduction**  
Reuses components, reducing waste and promoting environmentally conscious maintenance

**VALUE  
ADVANTAGE<sup>®</sup>**

New painting process to standardize the product finish and appearance. More actions coming soon.

## THE BENEFITS OF REMANUFACTURED TRANSMISSIONS

- 100% Inspection, tested and replacement of critical components
- 100% Updated valve body kits to replace worn valves and shifting concerns
- 100% Dynamometer end of line certification to ensure quality
