Attention: Nissan Dealer Principals, Executive Managers, Parts & Service Managers, Service Advisors

Subject: Choose the Right Oil Filter for Your Vehicle – FY25

Important: Due to current supply limitations affecting the OE oil filter 15208-65F1E, the Value Advantage® A520865F1PNW oil filter is authorized to use as a replacement, excluding warranty repairs, where the OE part number must still be used.

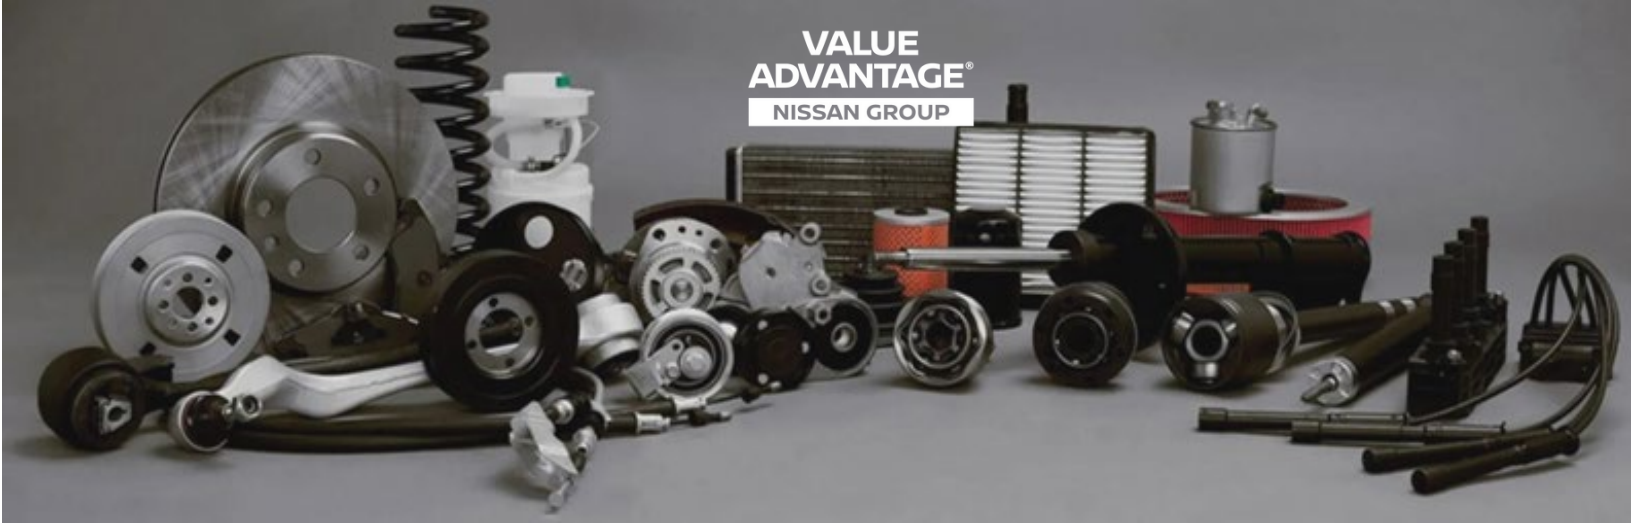

Please note that using an oil filter that does not meet the required specifications may reduce engine life, and any resulting damage is not covered under the NISSAN New Vehicle Limited Warranty.

Why can't part number 15208-65F0E replace 15208-65F1B / 15208-65F1A / 15208-65F1E?

- ➔ **Part number: 15208-65F1B / 15208-65F1A /15208-65F1E**
 - Relief valve opening pressure: 250 kPa
 - Ensures oil flows through the filtration element even with accumulated contaminants, maintaining proper oil flow to the engine

- ➔ **Part number: 15208-65F0E**
 - Relief valve opening pressure: 98 kPa
 - Using this filter may cause premature engine wear. The lower pressure threshold allows unfiltered oil to circulate when contaminants accumulate
